

N-of-One[®], Inc. Position Description

Job Title: Staff Scientist

N-of-One, Inc. seeks a Staff Scientist with a strong interest in cancer biology and a deep understanding of the cell signaling pathways that regulate growth, proliferation and apoptosis.

Company Summary:

N-of-One[®] is an exciting start-up company focused on an entirely new personalized model for cancer care. Science has generally deployed testing with an “n” of many. Our company is focused on the characteristics of each person’s tumor – an “n” of one. We utilize our state-of-the-art knowledge base to provide clinical interpretation services, to help patients and their medical teams develop cutting-edge diagnostic and treatment strategies that are customized to the biological characteristics of each individual's cancer. N-of-One is seeking a staff scientist to assist with the building and maintenance of the N-of-One customized Knowledgebase.

Job Summary:

The staff scientist will work closely within a curation team to provide research necessary to grow and maintain the N-of-One KnowledgeBase, which is used for the creation of client diagnostic and treatment strategies and to facilitate more effective decision-making and treatment options by the client and their medical teams.

Responsibilities include:

- Literature research on cancer biomarkers
- Writing brief synopses of literature and data surrounding biomarkers and cancer drugs.
- Synthesizing data into reports for cancer patients and their physician
- Reviewing clinical trials
- Participating in conference calls and other consultation with physicians and scientists to discuss their research and its applications to cancer patients

Working Relationships:

Primary working relationships and communication are with the Principal Scientists and the Editorial team. There may be contact with laboratories, clinical experts (advisory and consultant teams), oncologists, and others, as appropriate.

Required Experience, Skills and Knowledge:

- Must have substantial background in molecular biology or healthcare as a clinician and/or researcher.
- PhD or MD in biology/cancer related field
- Significant experience navigating scientific literature
- Ability to work in a tight team under deadline pressure
- Excellent, demonstrated, written and oral communication, organizational and computer skills

N-of-One, Inc. – not for distribution or publication.
